
appendix 1: catalogue of sites studied

the catalogue lists the different sites included in this research and contains 15 headings

name/place-name - commune - region - zone - country

these five headings provide general information for the series studied

inventory n°

a unique identifier has been given to each site, encoding both an abbreviation indicating country (CH, CZ, ES, F and HU) and a number from 1 to n (the distribution is in alphabetical order by acronym and then the place-name)

entry n°

data entry forms are numbered from 1 to n

site - site type - grave type

these three headings specify the nature and characteristics of the site and burial types

culture

the chronological or cultural attribution of the burials or different funerary occupations is identified here

number of tombs - number of individuals

the number of burials and individuals included are presented here (the number of individuals does not necessarily correspond to the NMI or number of interments at a site, but to the number observed)

bibliography

the principal references for the sites studied are listed here

commentary

the final heading, when needed, clarifies certain details

name/place name	Barmaz I	inventory n°	CH-01
commune	Collombey-Muraz	entry n°	1
region	Valais
