
appendix 2: catalogue of observed individuals

the catalogue lists all individuals studied in this research (the term "individual" designates, depending on the inhumation type, either a distinct subject or a single tooth, the latter typical of collective burials) and contains 11 headings

site

a unique identifier has been given to each site, encoding both an abbreviation indicating country (CH, CZ, ES, F and HU) and a number from 1 to n. The distribution is in alphabetical order by acronym and then the place-name

culture/period

chronological or cultural attribution of each individual is given here

individual

for each country, each individual has been assigned an individual identifier from 1 to n

grave

this is the inventory or excavation number for each individual

sex

sexual attribution of individuals is indicated as follows: "M" = male, "F" = female and "I" = indeterminate

age

age of individuals is indicated here. Letters are sometimes used, such as "M" for month and "NB" for newborn.

upper

this indicates, by yes/no, whether the teeth observed come from the maxilla (upper dentition)

lower

this indicates, by yes/no, whether the teeth observed come from the mandible (lower dentition)

type

this indicates the tooth type, "P" for permanent teeth and "D" for deciduous teeth

sup. ind.

this heading indicates whether the individual possess additional teeth belonging to a second subject, encoded yes/no

observation

this indicates whether the individual is represented only by isolated teeth
