
table 52: frequency of traits by group – permanent dentition
CZ-unmixed gender

the table presents the incidences and frequencies for the variables observed on the permanent dentition from the assemblages defined for the analyses

tables on the left list incidences and those on the right the number of observations (to simplify the tables, only the observed stages are shown)

definition of the units selected for the analysis are given opposite for each assemblage, the following are given:

- code used
- meaning of the code
- frequency in parentheses

CW-men	Corded Ware male sample (67 individuals)
CW-women	Corded Ware female sample (26 individuals)
CW-undefined	Corded Ware unsexed sample (adult and immature) (114 individuals)
BB-men	Bell Beaker male sample (35 individuals)
BB-women	Bell Beaker female sample (11 individuals)
BB-undefined	Bell Beaker unsexed sample (adult and immature) (52 individuals)
UN-men	Unetice male sample (76 individuals)
UN-women	Unetice female sample (25 individuals)
UN-undefined	Unetice unsexed sample (adult and immature) (100 individuals)
