

BAT 8720 No. 1

The length to the base ring is 2.74 m and the bore is 110 mm. The muzzle has a F-A-F-O arrangement. The second and first reinforcing rings have similar O-F-A-F mouldings. The vent field has plain F-A-F. The base-ring has an ogee and the cascabel has mouldings.

BAT 8721 No. 2

This gun has a length to the base ring of 2.78 m and a bore diameter of 125 mm. It has muzzle mouldings, a muzzle F-A-F-O. The second and first reinforcing rings have similar O-F-A-F mouldings. The vent field has plain F-A-F. The base-ring has an ogee and the cascabel has mouldings. See Fig. 32 for the contents of the bore.

BAT 8722 No. 3

This gun is broken into three parts. In design, it is very similar to BAT 8723 No. 4 and almost certainly was one of an exact pair. The mouldings are the same as No. 4 and discussed below.
