

Appendix I

Ceramic Summary and Catalogue

Four seasons of survey and excavation produced a sizeable quantity of ceramic remains. The vast majority of these are associated with three caves in particular—TCU s.08, TCU s.21 and Actun Lubul Ha—though diagnostic sherds were recovered from most contexts. Ceramic identification was based on a comparison of extensive trait lists with types and varieties identified in James C. Giffords (1976) *Prehistoric Pottery Analysis and the Ceramics of Barton Ramie in the Belize Valley*, a touchstone for all ceramic analyses in this portion of the Maya area. Other volumes were similarly referenced, including both Lisa LeCount's (1996) and Eleanor Harrison-Buck's (2007) dissertations. This analysis was conducted under guidance and with assistance from Rebecca Shelton, Dr. Reiko Ishihara, and Dr. Jaime Awe. Most of this data was summarized as it was applied to the discussions of the previous chapters. The pages that follow in this appendix include both **Table I.1**—a summary of vessel forms by sherd count and type: variety in TCU s.08—and more extensive catalogues. It must be noted that the tables dealing with both TCU s.08 and TCU s.21 do not include non-diagnostic sherds. The raw data is available upon request.

TCU10-9-290	001	TCU	s.21	D	8	9	Matrix	14.d	20	78	15.a	-	Slip with black geometric painted design	Hard	Orange	99			Grey-brown	Buff	Medium/Fine	X	-	sand	medium/fine	restricted	11.f	7	0.6	602	Bright orange slip on interior and exterior and black-painted, linear, geometric design may suggest Early Classic, however, ceramicists at 2010 workshop suggest that restricted ellipsoid with ring base and exterior thickening on rim is a Late Classic form. I am leaning toward an Early Classic date based on examples in Gifford that show slip and design to be more diagnostic than vessel form in this case (there are many examples of Early Classic vessels with closed forms and ring bases). Note: Vessel is incomplete and appears to have been broken into at least four pieces prior to deposition; old breaks are indicated on refitted vessel by clear nail polish.	-	-	-	-	Early Classic?	-
