| <b>List of Figures</b> .....  | <b>xvii</b>   |
| <b>List of Tables</b> .....   | <b>xxvii</b>  |
| <b>Preface</b> .....  | <b>xxviii</b> |
| <b>Introduction</b> .....   | <b>1</b>      |
| <b>1. Impression Analysis and Its History</b> .....   | <b>3</b>      |
| 1.1. What Is Impression Analysis? .....   | 3             |
| 1.2. Replication and Impression Analysis .....  | 3             |
| 1.2.1. What Are Pottery Impressions? .....  | 3             |
| 1.2.2. What Is the Replication-Based Approach? .....  | 3             |
| 1.3. The History of Research on Pottery Impressions .....   | 5             |
| 1.3.1. The History of the Replication-Based Approach in Japanese Archaeology .....  | 5             |
| 1.3.2. Attitudes Towards Grain Impressions and Use of Replication in the United Kingdom and Scandinavia .....                   | 6             |
| 1.3.3. Pottery Impressions as Archaeological Materials .....  | 7             |
| 1.4. Another Kind of Impression Analysis .....  | 10            |
| 1.4.1. A New Kind of Survey, Based on X-Ray .....   | 10            |
| 1.4.2. Tracing the Roots of Traceology: From Ushino’s Replication-Based Approach to Third Excavation .....                      | 10            |
| 1.5. Conclusion.....  | 10            |
| <b>2. Scientific Advances Brought About by the Impression Method</b> .....  | <b>13</b>     |
| 2.1. Description of Archaeological Eras in Japan .....  | 13            |
| 2.1.1. Chronology and Periodisation in Japanese Archaeology .....   | 13            |
| 2.1.2. Occupations and Cultural Characteristics of Each Period.....   | 13            |
| 2.2. The History of Studies of Plant Usage Before the Emergence of the Pottery Impression Method .....                          | 14            |
| 2.2.1. Studies of Seeds Excavated from the Soil of Archaeological Sites (Before the Year 2000).....                             | 14            |
| 2.2.2. Advancements in Scientific Investigation Methods and Applying the Pottery Impression Method (2001 Onward) .....          | 15            |
| 2.3. New Historical Views Revealed by the Impression Method.....  | 16            |
| 2.3.1. Changes in Views of the History of Domesticated Plants.....  | 16            |
| 2.3.2. Increased Use of Impression Surveys and the Spread of Cultivated Plants in Japan and Korea .....                         | 17            |
| 2.3.3. Development of Cereal Cultivation Throughout the Country (Verification of the Spread to Eastern Japan).....              | 17            |
| 2.3.4. Contributions to the Reconstruction of Lifestyle History (Recognition of Household Pests) .....                          | 19            |
| <b>3. Innovations in Impression Methods</b> .....   | <b>23</b>     |
| 3.1. The Limitations of the Replication-Based Approach.....   | 23            |
| 3.2. Impression Detection and Recording Using X-Ray Equipment .....   | 24            |
| 3.3. Results Using the New Method.....  | 25            |
| 3.4. A New Impression Detection and Identification Method (the ‘Kumamoto University Method’) .....                              | 27            |
| <b>4. Another Step Forward (the Ultimate Impression Method)</b> .....   | <b>31</b>     |
| 4.1. Weaknesses of the Impression Method and Methods of Overcoming Them (1) .....   | 31            |
| 4.1.1. Pottery Types Do Not Represent Time Periods .....  | 31            |
| 4.1.2. Methods of Overcoming the Issue (Extracting and Dating Carbon Embedded in Pottery) .....                                 | 32            |
| 4.1.3. Application of New Technology to Resolve Issues (Discoveries at the Etsuji and Kozako Sites) .....                       | 32            |
| 4.2. Weaknesses of the Impression Method and Methods of Overcoming Them (2) .....   | 33            |
| 4.2.1. Impression Seeds Do Not Show True Quantities .....   | 33            |
| 4.2.2. Methods of Overcoming This Issue (Adopting Various Scientific Methods of Analysis) .....                                 | 33            |
| 4.3. Establishing the Future of Archaeological Material Science Around Pottery: ‘A Comprehensive Analysis of Earthenware’ ..... | 35            |
| <b>5. Methods for Identifying Plants and Insects</b> .....  | <b>37</b>     |
| 5.1. Identifying Legume Species.....  | 37            |
| 5.1.1. Past Methodologies for Identifying Legume Species.....   | 37            |
| 5.1.2. Legumes and Excavated Legume Pulses.....   | 41            |

|  |           |
|--|-----------|
| 5.1.3. Identifying Pulses .....  | 42        |
| 5.2. Identifying Insects .....   | 44        |
| 5.2.1. Anatomical Characteristics of Insects .....   | 44        |
| 5.2.2. Classification of Larvae (Hornworm) .....   | 49        |
| 5.2.3. Classification of Cockroach Egg Capsules .....  | 49        |
| 5.2.4. Classifying the Pupae of Flies .....  | 52        |
| <b>6. New Facts About Prehistoric Japan Revealed by Impression Methods .....</b>   | <b>57</b> |
| 6.1. Origin of Household Cockroaches .....   | 57        |
| 6.1.1. Household Cockroaches in Modern Japan .....   | 57        |
| 6.1.2. Archaeological Specimens in the Jōmon Period .....  | 57        |
| 6.1.3. Identification of the Species .....   | 57        |
| 6.1.4. Establishment of Stable Lifestyle and Household Pests .....   | 58        |
| 6.2. Species of <i>Sitophilus</i> ( <i>Sitophilus</i> spp.) .....  | 59        |
| 6.2.1. Overview .....  | 59        |
| 6.2.2. Maize Weevil ( <i>Sitophilus zeamais</i> Motschulsky).....  | 59        |
| 6.2.3. The Origin and History of the Dispersion of <i>Sitophilus</i> : Distribution According to Historical and<br>Archaeological Materials .....                            | 64        |
| 6.3. Discovery of the Maize Weevil ( <i>Sitophilus zeamais</i> ) in China.....   | 83        |
| 6.4. Discovery of Insect-Resistant Plants.....   | 83        |
| 6.5. Pottery Containing an Abundance of Seed or Animal Impressions .....   | 85        |
| 6.5.1. Introduction .....  | 85        |
| 6.5.2. The Characteristics of Seed and Arthropod Impressions in Clay: the Pottery Workspace.....   | 85        |
| 6.5.3. Pottery Containing an Abundance of Seeds .....  | 86        |
| 6.5.4. Characteristics of Seeds in Mixtures .....  | 92        |
| 6.5.5. Controversies and Issues of Concern .....   | 92        |
| 6.5.6. The Intention of Admixture .....  | 94        |
| <b>7. Identification of Key Impression Plants/Insects and Main Sources Used (Jōmon to Yayoi).....</b>  | <b>97</b> |
| 7.1. Soybean: <i>Glycine max</i> (L.) Merr. subsp. <i>Max</i> ; Japanese name: Daizu; Korean n.: 콩, Chinese n.: 大豆<br>(Fig. 7.1–Fig. 7.9) .....                              | 97        |
| 7.1.1. Characteristics .....   | 97        |
| 7.1.2. Seed/kernel morphology.....   | 97        |
| 7.1.3. Archaeological specimens .....  | 98        |
| 7.1.4. Usage .....   | 98        |
| 7.2. Adzuki bean: <i>Vigna angularis</i> (Willd.) Ohwi et H. Ohashi var. <i>angularis</i> ; Japanese name: Adzuki;<br>Korean n.: 팥; Chinese n. 紅豆 (Fig. 7.10–Fig. 7.16)..... | 99        |
| 7.2.1 Characteristics .....  | 99        |
| 7.2.2. Seed/kernel morphology.....   | 100       |
| 7.2.3. Archaeological specimens .....  | 100       |
| 7.2.4. Usage .....   | 101       |
| 7.3. Perilla (Beefsteak plant): <i>Perilla</i> spp.; Japanese name: Shiso (Egoma); Korean n.: 들깨속;<br>Chinese n. 紫蘇属 (Fig. 7.17–Fig. 7.25).....                              | 101       |
| 7.3.1. Characteristics .....   | 101       |
| 7.3.2. Seed/kernel morphology.....   | 103       |
| 7.3.3. Archaeological specimens .....  | 103       |
| 7.3.4. Usage .....   | 104       |
| 7.4. Japanese barnyard millet: <i>Echinochloa utilis</i> ; Japanese name: Hie; Korean n.: 피; Chinese n. 稗<br>(Fig. 7.26–Fig. 7.30) .....                                     | 104       |
| 7.4.1. Characteristics .....   | 104       |
| 7.4.2. Seed/kernel morphology.....   | 105       |
| 7.4.3. Archaeological specimens .....  | 105       |
| 7.4.4. Usage .....   | 106       |
| 7.5. Japanese lacquer tree: <i>Toxicodendron</i> spp., <i>Rhus</i> spp.; Japanese name: Urushi, Nurude, etc.;<br>Korean n.: 옷나무; Chinese n.: 漆樹 (Fig. 7.31–Fig. 7.35).....   | 106       |
| 7.5.1. Characteristics .....   | 106       |
| 7.5.2. Seed/kernel morphology.....   | 106       |
| 7.5.3. Archaeological specimens .....  | 107       |

|   |     |
|---|-----|
| 7.5.4. Usage.....   | 107 |
| 7.6. Hemp: <i>Cannabis sativa</i> L.; Japanese name: Asa; Korean n.: 삼; Chinese n.: 大麻 (Fig. 7.36–Fig. 7.38) .....  | 107 |
| 7.6.1. Characteristics .....  | 107 |
| 7.6.2. Seed/kernel morphology.....  | 108 |
| 7.6.3. Archaeological specimens .....   | 108 |
| 7.6.4. Usage.....   | 109 |
| 7.7. Job’s tear: <i>Coix lacryma-jobi</i> var. <i>ma-yuen</i> ; Japanese name: Hatomugi; Korean n.: 울무;<br>Chinese n.: 台灣薏苡 (Fig. 7.39–Fig. 7.41) .....                               | 109 |
| 7.7.1. Characteristics .....  | 109 |
| 7.7.2. Seed/kernel morphology.....  | 109 |
| 7.7.3. Archaeological specimens .....   | 109 |
| 7.7.4. Usage.....   | 109 |
| 7.8. Acorns: <i>Quercus</i> spp., <i>Lithocarpus</i> spp., <i>Castanopsis</i> spp.; Japanese name: Donguri; Korean n.:<br>도토리 (참나무속); Chinese n.: 橡子 (栎属) (Fig. 7.42–Fig. 7.53) ..... | 110 |
| 7.8.1. Characteristics .....  | 110 |
| 7.8.2. Seed/kernel morphology.....  | 111 |
| 7.8.3. Archaeological specimens .....   | 111 |
| 7.8.4. Usage.....   | 111 |
| 7.9. Elymus: <i>Elymus</i> spp.; Japanese name: Ezomugi (Kamojigusa); Korean n.: 갯보리속;<br>Chinese n.: 披碱草属 (Fig. 7.54–Fig. 7.56) .....  | 114 |
| 7.9.1. Characteristics .....  | 114 |
| 7.9.2. Seed/kernel morphology.....  | 114 |
| 7.9.3. Archaeological specimens .....   | 115 |
| 7.9.4. Usage.....   | 115 |
| 7.10. Bamboo grass: <i>Sasa</i> spp.; Japanese name: Sasa; Korean n.: 섬조릿대속; Chinese n.: 赤竹属<br>(Fig. 7.57–Fig. 7.61) .....   | 115 |
| 7.10.1. Characteristics .....   | 115 |
| 7.10.2. Seed/kernel morphology.....   | 115 |
| 7.10.3. Archaeological specimens .....  | 116 |
| 7.10.4. Usage.....  | 116 |
| 7.11. Burdock: <i>Arctium lappa</i> ; Japanese name: Gobou; Korean n.: 우엉; Chinese n.: 牛蒡<br>(Fig. 7.62–Fig. 7.64).....   | 116 |
| 7.11.1. Characteristics .....   | 116 |
| 7.11.2. Seed/kernel morphology.....   | 117 |
| 7.11.3. Archaeological specimens .....  | 117 |
| 7.11.4. Usage .....   | 117 |
| 7.12. Grape family: <i>Vitaceae</i> ; Japanese name: Budo; Korean n.: 포도과; Chinese n.: 葡萄科<br>(Fig. 7.65–Fig. 7.70) .....   | 117 |
| 7.12.1. Characteristics .....   | 117 |
| 7.12.2. Seed/kernel morphology.....   | 119 |
| 7.12.3. Archaeological specimens .....  | 119 |
| 7.12.4. Usage.....  | 119 |
| 7.13. Bramble: <i>Rubus</i> spp.; Japanese name: Kiichigo; Korean n.: 산딸기속; Chinese n.: 悬钩子属<br>(Fig. 7.71–Fig. 7.84) .....   | 119 |
| 7.13.1. Characteristics .....   | 119 |
| 7.13.2. Seed/kernel morphology.....   | 124 |
| 7.13.3. Archaeological specimens .....  | 124 |
| 7.13.4. Usage.....  | 124 |
| 7.14. Amur corktree: <i>Phellodendron amurense</i> ; Japanese name: Kihada; Korean n.: 황다랑어;<br>Chinese n.: 黄鳍金枪鱼 (Fig. 7.85–Fig. 7.87).....  | 124 |
| 7.14.1. Characteristics .....   | 124 |
| 7.14.2. Seed/kernel morphology.....   | 124 |
| 7.14.3. Archaeological specimens .....  | 124 |
| 7.14.4. Usage.....  | 124 |
| 7.15. Giant dogwood: <i>Cornus macrophylla</i> (Wall.) Soják; Japanese name: Kumanomizuki;<br>Korean n.: 곰의말채나무, Chinese n.: 楝木 (Fig. 7.88–Fig. 7.89, 7.92) .....                     | 124 |
| 7.15.1. Characteristics .....   | 124 |
| 7.15.2. Seed/kernel morphology.....   | 124 |
| 7.15.3. Archaeological specimens .....  | 124 |

|  |     |
|--|-----|
| 7.15.4. Usage.....   | 124 |
| 7.16. Giant dogwood: <i>Cornus controversa</i> Hemsl. ex Prain; Japanese name: Mizuki; Korean n.:<br>총총나무; Chinese n.: 灯台树 (Fig. 7.90–Fig. 7.92).....                                    | 125 |
| 7.16.1. Characteristics.....   | 125 |
| 7.16.2. Seed/kernel morphology.....  | 125 |
| 7.16.3. Archaeological specimens.....  | 126 |
| 7.16.4. Usage.....   | 126 |
| 7.17. Japanese red elder: <i>Sambucus racemosa</i> L. subsp. <i>sieboldiana</i> (Miq.) H. Hara; Japanese name:<br>Niwatoko; Korean n.: 덧나무; Chinese n.: 无梗接骨木 (Fig. 7.93–Fig. 7.97)..... | 126 |
| 7.17.1. Characteristics.....   | 126 |
| 7.17.2. Seed/kernel morphology.....  | 127 |
| 7.17.3. Archaeological specimens.....  | 127 |
| 7.17.4. Usage.....   | 127 |
| 7.18. Japanese prickly-ash: <i>Zanthoxylum ailanthoides</i> ; Japanese name: Karasuzanshou;<br>Korean n.: 머귀나무; Chinese n.: 食茱萸 (Fig. 7.98–Fig. 7.102).....                              | 127 |
| 7.18.1. Characteristics.....   | 127 |
| 7.18.2. Seed/kernel morphology.....  | 127 |
| 7.18.3. Archaeological specimens.....  | 127 |
| 7.18.4. Usage.....   | 129 |
| 7.19. Beggar’s lice: <i>Hylodesmum podocarpum</i> ; Japanese name: Nusubito-hagi; Korean n.: 도둑놈의갈고리;<br>Chinese n.: 山蚂蝗 (Fig. 7.103–Fig. 7.105).....                                    | 129 |
| 7.19.1. Characteristics.....   | 129 |
| 7.19.2. Seed/kernel morphology.....  | 129 |
| 7.19.3. Archaeological specimens.....  | 129 |
| 7.19.4. Usage.....   | 129 |
| 7.20. Ox knee: <i>Achyranthes bidentata</i> var. <i>japonica</i> ; Japanese name: Inokozuchi; Korean n.: 쇠무릎;<br>Chinese n.: 牛膝 (Fig. 7.106–Fig. 7.108).....                             | 130 |
| 7.20.1. Characteristics.....   | 130 |
| 7.20.2. Seed/kernel morphology.....  | 130 |
| 7.20.3. Archaeological specimens.....  | 131 |
| 7.20.4. Usage.....   | 131 |
| 7.21. Agrimony: <i>Agrimonia pilosa</i> var. <i>viscidia</i> ; Japanese name: Kinmizuhiki; Korean n.: (짚신나물속);<br>Chinese n.: (龍牙草屬) (Fig. 7.109–Fig. 7.111).....                        | 131 |
| 7.21.1. Characteristics.....   | 131 |
| 7.21.2. Seed/kernel morphology.....  | 131 |
| 7.21.3. Archaeological specimens.....  | 131 |
| 7.21.4. Usage.....   | 132 |
| 7.22. Rice: <i>Oryza sativa</i> L.; Japanese name: Ine; Korean n.: 벼; Chinese n.: 稻 (Fig. 7.112–Fig. 7.116).....   | 132 |
| 7.22.1. Characteristics.....   | 132 |
| 7.22.2. Seed/kernel morphology.....  | 133 |
| 7.22.3. Archaeological specimens.....  | 133 |
| 7.22.4. Usage.....   | 133 |
| 7.23. Foxtail millet: <i>Setaria italica</i> ; Japanese name: Awa; Korean n.: 조; Chinese n.: 粟<br>(Fig. 7.117–Fig. 7.121).....   | 134 |
| 7.23.1. Characteristics.....   | 134 |
| 7.23.2. Seed/kernel morphology.....  | 134 |
| 7.23.3. Archaeological specimens.....  | 134 |
| 7.23.4. Usage.....   | 135 |
| 7.24. Common millet: <i>Panicum miliaceum</i> ; Japanese name: Kibi; Korean n.: 기장; Chinese n.: 黍<br>(Fig. 7.122–Fig. 7.126).....  | 136 |
| 7.24.1. Characteristics.....   | 136 |
| 7.24.2. Seed/fruit morphology.....   | 136 |
| 7.24.3. Archaeological specimens.....  | 136 |
| 7.24.4. Usage.....   | 137 |
| 7.25. Barley: <i>Hordeum vulgare</i> L.; Japanese name: Ohmuji; Korean n.: 보리; Chinese n.: 大麦<br>(Fig. 7.127–Fig. 7.129).....  | 138 |
| 7.25.1. Characteristics.....   | 138 |
| 7.25.2. Seed/kernel morphology.....  | 138 |
| 7.25.3. Archaeological specimens.....  | 138 |

|  |            |
|--|------------|
| 7.25.4. Usage.....   | 139        |
| 7.26. Cockroach (egg capsule): <i>Periplaneta</i> spp.; Japanese name: Gokiburi; Korean n.: 바퀴벌레;<br>Chinese n.: 蟑螂 (Fig. 7.130–Fig. 7.132) .....                        | 139        |
| 7.26.1. Characteristics .....  | 139        |
| 7.26.2. Morphology.....  | 139        |
| 7.26.3. Archaeological specimens .....   | 140        |
| 7.27. Maize weevil: <i>Sitophilus zeamais</i> Motschulsky; Japanese name: Kokuzomushi; Korean n.:<br>쌀바구미; Chinese n.: 米象 (Fig. 7.133–Fig. 7.140).....                   | 140        |
| 7.28. Turnip (Rape): <i>Brassica</i> spp.; Japanese name: Kabu (Aburana); Korean n.: 순무; Chinese n.:<br>芜菁 (Fig. 7.141–Fig. 7.143) .....                                 | 141        |
| 7.28.1. Characteristics .....  | 141        |
| 7.28.2. Seed/kernel morphology.....  | 141        |
| 7.28.3. Archaeological specimens .....   | 142        |
| 7.28.4. Usage.....   | 142        |
| 7.29. Gourd: <i>Lagenaria siceraria</i> var. <i>gourda</i> ; Japanese name: Hyoutan; Korean n.: 박; Chinese n.:<br>葫芦 (Fig. 7.144–Fig. 7.146) .....                       | 142        |
| 7.29.1. Characteristics .....  | 142        |
| 7.29.2. Seed/kernel morphology.....  | 143        |
| 7.29.3. Archaeological specimens .....   | 143        |
| 7.29.4. Usage.....   | 143        |
| 7.30. Chestnut: <i>Castanea crenata</i> ; Japanese name: Kuri; Korean n.: 밤나무; Chinese n.: 胡桃<br>(Fig. 7.147–Fig. 7.149) .....   | 143        |
| 7.31. Japanese horse chestnut: <i>Aesculus turbinata</i> ; Japanese name: Tochinoki; Korean n.: 칠엽수;<br>Chinese n.: 日本七叶树 (Fig. 7.150–Fig. 7.152).....                   | 144        |
| 7.32. Japanese walnut: <i>Juglans mandshurica</i> var. <i>sachalinensis</i> ; Japanese name: Onigurumi;<br>Korean n.: 가래나무; Chinese n.: 胡桃楸 (Fig. 7.153–Fig. 7.155)..... | 145        |
| 7.33. Nepal hog plum: <i>Choerospondias axillaris</i> ; Japanese name: Chanchinmodoki; Chinese n.:<br>南酸枣 (Fig. 7.156–Fig. 7.158) .....                                  | 146        |
| 7.34. Wheat: <i>Triticum compactum</i> ; Japanese name: Komugi; Korean n.: 밀; Chinese n.: 小麦<br>(Fig. 7.159–Fig. 7.161) .....  | 146        |
| 7.34.1. Characteristics .....  | 146        |
| 7.34.2. Seed/kernel morphology.....  | 147        |
| 7.34.3. Archaeological specimens .....   | 147        |
| 7.34.4. Usage.....   | 147        |
| 7.35. Buckwheat: <i>Fagopyrum esculentum</i> Moench; Japanese name: Soba; Korean n.: 메밀;<br>Chinese n.: 蕎麦 (Fig. 7.162–Fig. 7.164) .....                                 | 148        |
| 7.35.1. Characteristics .....  | 148        |
| 7.35.2. Seed/kernel morphology.....  | 149        |
| 7.35.3. Archaeological specimens .....   | 149        |
| 7.35.4. Usage.....   | 149        |
| 7.36. Concluding Remarks.....  | 149        |
