Acknowledgements	v
Foreword.....	ix
List of Figures.....	xv
List of Tables.....	xxv
1. Introduction	1
2. The study area: a geographical and historical introduction.....	5
2.1. Valsugana	5
2.2. The Cembra Valley.....	8
2.3. The Pinè plateau.....	9
2.4. The area in the Roman and medieval periods. An introduction.....	9
2.5. Ancient road systems. Interregional roads and local paths	11
Ancient road system in Valsugana	12
Ancient road systems in Val di Cembra and on the Pinè plateau.....	15
2.6. Medieval parishes and chapels.....	15
3. Eastern Trentino in the Roman and medieval periods. The archaeological record.....	19
3.1. The archaeological dataset: potential and limits	19
3.2. The archaeological evidence from the Roman period	20
The Cembra Valley.....	20
The Pinè Plateau	22
Valsugana	22
3.3. The late antique and early medieval period (6th–7th century)	25
3.4. The diffusion of Christianity and the archaeology of churches	29
4. Materials and methods	33
4.1. The Trentino landscapes and their archaeological visibility	33
4.2. Mapping and managing previous archaeological data: The APSAT Web-GIS platform	36
4.3. The use of local GIS projects	36
4.4. Remote Sensing Analysis.....	37
4.5. Fieldwork and site reconnaissance.....	38
4.6. The analysis of archival records.....	39
4.7. Environmental data	39
5. Air photo interpretation	41
5.1. Introduction. Air photography and archaeology	41
5.2. Material and Methods	42
5.3. The 1954 and 1958 flights.....	42
5.4. The use of digital orthophotos	43
5.5. Results.....	44
The 1954–58 GAI Flights	44
RGB and nIR orthophotos: typology and distribution of the anomalies	48
5.6. Conclusions. Benefits of comparative analysis between the stereoscopic 1950s air photos and 2000s digital orthophotos	63
6. The analysis of LiDAR DTM	65
6.1. Lidar applications in archaeology.....	65
6.2. The use of LiDAR Data as part of the APSAT project	69
Main technical data of the Trentino LiDAR survey.....	70
6.3. LiDAR DTM Analysis. Comparing different visualisation tools within the APSAT study area	71
Hillshade	72
Slope analysis.....	72
Constrained colour ramps (CCR).....	72
Principal component analysis (PCA)	73

Sky-View Factor, Visible Sky and Solar radiation analysis for the analysis of hill-top sites	74
Local relief model	75
The DTM visualisation tools applied to Trentino's areas: comparing the results.....	76
6.4. LiDAR DTM analysis: typology and distribution of the mapped contexts.....	79
6.5. LiDAR analysis of hilltop sites. A methodological evaluation.....	82
TS01. Colle di San Pietro (Telve di Sopra, Torcegno).....	83
TS02. Tesobbo Castle (Roncegno).....	90
TS03. Mount Broi	92
TS04. Maso Goccia d'Oro (Levico)	94
TS05. Dosso del Bue (Vattaro)	97
TS06. Colle Tegazzo (Pergine)	101
TS 11. Doss Ciaslir (Cembra).....	105
TS 12. Doss Venticcia (Segonzano).....	108
6.6. LiDAR DTM analysis in eastern Trentino. Final remarks.....	109
a) Problems of visibility and the advantages offered by LiDAR DTM	109
b) The DTM resolution and the advantages of a combined LiDAR and air photo interpretation	110
c) Limits of LiDAR DTM.....	110
d) Centrality of the site reconnaissance	110
e) The role of supporting documentation.....	111
f) The need for invasive archaeological approaches	111
7. The archaeology of agrarian landscapes in the Alps: off the beaten track.....	113
7.1. Agricultural archaeology: methods and objectives	113
7.2. The analysis of field systems in the research area: morpho-typological classes	115
Planned and geometrically organised fields.....	115
Open fields and furlongs	117
Fan-shaped fields	121
Terraced systems	122
Irregularly shaped fields.....	125
A case study: the medieval landscape of Magnago	127
7.3. Agrarian archaeology in Valsugana: the sample area.....	131
VB01. Caldonazzo	132
VB02. Levico Terme.....	139
VB03. Quare-Lochere, Santa Giuliana e Barco	143
VB04. Novaledo	145
VB05. Marter	151
VB06. Roncegno.....	160
VB07. Olle and Spagolle	165
VB08. Borgo, Telve and Castelnuovo.....	169
7.4. Conclusions: for an overall evolution of the Valsugana field systems.....	174
Period 1a (before the 12th centuries)	174
Period 1b (12th century)	174
Period 2 (12th–14th century)	176
Period 3 (15th–16th centuries).....	177
Period 4 (17th–18th centuries): field systems and enclosures	177
Period 5 (late 18th–mid 19th centuries).....	177
Period 6 (second half of the 19th century–20th century).....	178
Period 7 (20th century)	178
8. People, environment, and plants in a changing world.....	181
8.1. The field system evolution in Valsugana: some more remarks.....	181
8.2. Roman and medieval agrarian landscapes: introducing a comparative approach	182
8.3. Environmental change and the appearance of a new landscape? “A question to be pursued”	183
8.4. Environmental evolution and the Lombards: a changing landscape?.....	187
8.5. What agriculture, what economy? The ‘lords of the land’ and the agricultural potential of Valsugana.....	187
8.6. The medieval agricultural production: crops, rents and powers	189
8.7. Archaeology and agricultural production: a socio-economic approach to the study area	191
8.8. An evolving landscape. Field systems and political borders	192

9. Power in the landscape. Castles, people, and economic resources	195
9.1. Castles in the research area: quantitative data and spatial distribution.....	195
9.2. The pace of <i>incastellamento</i> in eastern Trentino	195
Late Antique – early Medieval castles	197
Period I (second half of the 12th century)	197
Period II (first half of the 13th century).....	200
Period III (second half of the 13th century).....	202
Period IV (1301–1350 CE).....	203
Period V (1351–1400 CE).....	205
9.3. For a geography of the feudal powers: bishops, seigneurial families and castles	205
The lords of Roccabruna.....	205
The Lords of Telve.....	206
The Lords of Caldonazzo and the Caldonazzo-Castelnuovo.....	207
9.4. Written sources and the material evidence.....	210
9.5. Late medieval castles and their material culture.....	211
9.6. Castles and landscapes: the morphology of a multiform dialectic	214
9.7. Castles, villages and fields: visualising the power in the countryside	223
9.8. Conclusions.....	226
10. Conclusions.....	229
10.1. A movable mountain: the everchanging nature of the Alpine landscapes in eastern Trentino.....	229
10.2. The political ecology of the eastern Trentino landscapes	230
10.3. A political dimension of the taskscape?.....	231
10.4. Imagining a step further ahead: future research on the eastern Trentino landscapes.....	233
Toward robust fieldwork projects	234
New ideas, new projects	234
Disasters, climate change and resilience in the Trentino Alps.....	234
The archaeology of the still occupied villages.....	234
Public archaeology in eastern Trentino.....	235
The archaeology of sustainability	235
Afterword.....	237
Bibliography	239
