List of Figures.....	xi
List of Tables.....	xv
Abstract.....	xvii
Preface.....	xix
Commemorating Hung Ling-yu	xxi
Studying with Hung Ling-yu.....	xxiii
Foreword.....	xxv
1. Introduction.....	1
1.1 Theoretical Considerations.....	1
1.2 Research Questions and Objectives	3
1.3 Environmental Setting.....	4
1.3.1 The Gansu-Qinghai Area in Eastern Monsoon China	5
1.3.2 The Study Area in Northwest Arid China	6
1.3.3 The Study Area on the Tibetan Frigid Plateau	7
1.3.4 Paleoclimate during the Majiayao Cultural Period	7
1.4 The Archaeological Culture Known as Majiayao	7
1.4.1 J. G. Andersson's Discoveries and Hypotheses	8
1.4.2 The Definition of the Majiayao Culture	9
1.4.3 Modeling Pottery Production during the Majiayao Cultural Period	9
1.5 Study Materials and Methods.....	10
1.5.1 Survey Data.....	10
1.5.2 Excavated Data.....	10
1.5.3 Field Data	11
1.5.4 Laboratory Data	11
1.6 Outline of the Dissertation	12
2. The Majiayao Phase (MJYP).....	15
2.1 Chronological Framework	15
2.2 Settlement Patterns in the MJYP.....	16
2.2.1 Spatial and Site-size Distribution.....	16
2.2.2 An Example of MJYP Villages	20
2.3 MJYP Painted Pottery Vessels	21
2.3.1 Time-consuming Manufacturing Processes	22
2.3.2 Chronological Variations.....	24
2.3.3 Regional Variation in Vessel Quantity	32
2.3.4 Physicochemical Evidence for Inter-regional Pottery Exchange.....	37
2.4 Mortuary Practice in the MJYP.....	41
2.4.1 Regional Differentiation in the Frequency of Secondary Burial.....	42
2.4.2 Burial Postures and Regional Origins	44
2.4.3 Grave Construction	45
2.4.4 Grave Goods.....	46
2.4.5 Discussion	48
2.5. Conclusion.....	48
3. The Banshan Phase (BSP).....	51
3.1 Chronological Framework	51
3.2 Settlement Patterns in the BSP.....	51
3.2.1 Spatial Distribution	52
3.2.2 Site-size Distribution.....	53
3.2.3 Examples of BSP Houses.....	56
3.3 BSP Painted Pottery Vessels.....	56
3.3.1 Chronological Variation	57
3.3.2 Decrease in Production Output in the Early BSP.....	62
3.3.3 Regionalized Development of Painted Pottery Production.....	63

Painted Pottery Production and Social Complexity in Neolithic Northwest China

3.3.4 Evidence of Inter-regional Pottery Exchange	71
3.4 Mortuary Practice in the BSP.....	71
3.4.1 Continuing Regional Differences in the Frequency of Practicing Secondary Burial.....	73
3.4.2 Different Regional Burial Postures	74
3.4.3 Cenotaphs and Multiple Burials.....	76
3.4.4 Grave Construction	78
3.4.5 Grave Goods.....	80
3.5 Conclusion.....	86
4. The Machang Phase (MCP)	89
4.1 Chronological Framework	89
4.2 Settlement Patterns in the MCP	90
4.2.1 Spatial and site-size Distribution	90
4.2.2 Examples of MCP Villages	93
4.3 MCP Painted Pottery Vessels	95
4.3.1 Elaborate Early MCP Painted Pottery from Central Gansu	96
4.3.2 Uneven Quality of Early MCP painted pottery from Northeastern Qinghai.....	99
4.3.3 Intense Production in the Huangshui River Valley during the Middle MCP	102
4.3.4 Decline of Production in the Huangshui River Valley during the Late MCP	106
4.3.5 Regional Pottery Production in the Hexi Corridor.....	107
4.3.6 Evidence of Inter-regional Pottery Exchange	108
4.4 Mortuary Practice in the MCP	112
4.4.1 Continuing Regional Difference in the Frequency of Secondary Burial	112
4.4.2 Burial Postures and Evidence of Migration	113
4.4.3 High Frequency of Multiple Burials in the Early MCP	115
4.4.4 Grave Construction	121
4.4.5 Grave Goods.....	123
4.5 Conclusion.....	125
5. Conclusion	129
5.1 Settlement Pattern, Environment, and Painted Pottery Production.....	129
5.2 Different regional groups, their movement, and interaction	130
5.3 Modeling Painted Pottery Production and Distribution	131
5.3.1 Pottery Vessels as Commodities.....	131
5.3.2 Painted Pottery Export: Direction and Driving Forces	133
5.3.3 Increasing heterogeneous pottery production	135
5.4 Social Inequality and Painted Pottery Vessels	136
5.5 Conclusion.....	137
Chinese Glossary	139
Appendix-A.....	143
Appendix-B.....	165
Appendix-C.....	169
Appendix-D.....	171
Appendix-E.....	175
Bibliography	177

List of Figures

Figure 1.1 The study area of this dissertation: the Majiayao Culture in the Gansu-Qinghai area.....	2
Figure 1.2 The division of three natural realms in the Gansu-Qinghai area.....	4
Figure 1.3 Modern districts in Gansu and Qinghai provinces discussed in this study	5
Figure 1.4 River systems discussed in the study area.....	6
Figure 1.5 Change in precipitation and temperature during the past 10,000 years, indicated by the studies of pollen from the Qinghai Lake	7
Figure 1.6 Locations of museums and archaeological institutes visited in this study	12
Figure 1.7 Pictures of the vessels and microscopic images of the profiles among four samples for physicochemical study obtained from Liuwan	12
Figure 2.1 Distribution of MJYP sites discussed in this study	16
Figure 2.2 Distribution of MJYP sites in the Gansu-Qinghai area	17
Figure 2.3 Histograms showing the overall site-size distribution of the 182 MJYP sample sites in the Gansu-Qinghai area and regional variations	19
Figure 2.4 Distribution of the first/second-tier MJYP sites in the Gansu-Qinghai area	20
Figure 2.5 Examples of analyzed samples of MJYP painted potsherds	23
Figure 2.6 Typical MJYP I painted pottery vessels	24
Figure 2.7 Typical MJYP II painted pottery vessels.....	25
Figure 2.8 Examples of similar MJYP II painted pottery vessels unearthed from different sites located in the Gansu-Qinghai area.....	26
Figure 2.9 Typical MJYP III painted pottery vessels.....	27
Figure 2.10 Six painted pottery vessels unearthed from burial M1 at Dujiaping.....	28
Figure 2.11 Pen basins painted with similar dancing figures dated to MJYP III.....	29
Figure 2.12 Typical MJYP IV painted pottery vessels.....	30
Figure 2.13 The rich grave at Hetaozhuang.....	31
Figure 2.14 The ceramic assemblage from burial M1 at Naozhuang.....	34
Figure 2.15 MJYP III painted pottery vessels.....	35
Figure 2.16 Typical MJYP IV painted pottery vessels.....	36
Figure 2.17 Box plot of CaO and MgO content among 170 samples selected from 5 sites in Gansu and 3 sites in Sichuan	38

Painted Pottery Production and Social Complexity in Neolithic Northwest China

Figure 2.18 Principle component analysis for 170 samples selected from 8 sites in Gansu and Sichuan.....	39
Figure 2.19 Box plot of K ₂ O, Na ₂ O, and SrO content among 170 samples selected from 8 sites in Gansu and Sichuan	40
Figure 2.20 Examples of samples belonging to three geochemical groups of ceramic samples selected from Zongri	42
Figure 2.21 Bivariate plots of CaO and MgO and Fe ₂ O ₃ and Al ₂ O ₃ for 26 samples selected from Zongri	43
Figure 2.22 An example of a slate-chambered shaft grave containing two individuals interred in extended supine positions at Zongri	43
Figure 3.1 Distribution of the excavated BSP sites in the Gansu-Qinghai area discussed in this study	52
Figure 3.2 Distribution of BSP sites in the Gansu-Qinghai area	53
Figure 3.3 Histograms showing the overall site-size distribution of the 117 BSP sample sites in the Gansu-Qinghai area and regional variations.....	54
Figure 3.4 Distribution of the first/second-tier BSP sites in the Gansu-Qinghai area	55
Figure 3.5 Reconstructions of houses of the BSP at Qinggangcha, Lanzhou, central Gansu.....	56
Figure 3.6 Early BSP vessels painted pottery from the cemetery at Bianjialin	58
Figure 3.7 Early BSP vessels painted pottery from Huazhaizi	59
Figure 3.8 Middle BSP I painted pottery vessels from Dibaping	60
Figure 3.9 Middle BSP II painted pottery vessels from Bianjiagou	61
Figure 3.10 Late BSP painted pottery vessels from Tugutai.....	62
Figure 3.11 Early BSP painted pottery vessels from Liuwan	66
Figure 3.12 Middle BSP painted potteyr vessels from Liuwan	67
Figure 3.13 Samples with different types of textures from Liuwan	68
Figure 3.14 Middle BSP painted pottery vessels from Suhusa.....	69
Figure 3.15 Middle and late BSP painted pottery vessels from the Hexi Corridor	70
Figure 3.16 Middle BSP painted pottery vessels from different regions yet similar to those predominantly found in the Linxia and Lanzhou areas in central Gansu	72
Figure 3.17 Distribution of graves at Dibaping	75
Figure 3.18 A BSP cenotaph at Liuwan	77
Figure 3.19 A late BSP multiple burial containing six individuals at Liuwan.....	78
Figure 3.20 A late BSP shaft and side-chamber grave at Tugutai.....	80
Figure 3.21 A middle BSP simple shaft grave with a niche at Suhusa	81
Figure 3.22 Quantity of pots and painted pots per grave at Huazhaizi	82

Figure 3.23 The Huazhaizi cemetery and the distribution of painted pottery vessels in the cemetery.....	83
Figure 3.24 An example of a rich grave at Huazhaizi.....	84
Figure 3.25 Quantity of pots and painted pots per grave at Dibaping	85
Figure 4.1 Distribution of the excavated MCP sites in the Gansu-Qinghai area	90
Figure 4.2 Distribution of MCP sites in the Gansu-Qinghai area.....	91
Figure 4.3 Histograms showing the overall site-size distribution of the 382 MCP sample sites in the Gansu-Qinghai area	92
Figure 4.4 Histograms showing regional variations in site-size distribution of the MCP sample sites in the Gansu-Qinghai area	92
Figure 4.5 Distribution of the first/second-tier MCP settlements in the Gansu-Qinghai area	94
Figure 4.6 Two kilns surrounding a working pit found at Baidaogouping	95
Figure 4.7 Early MCP painted pottery vessels from Baidaogouping	96
Figure 4.8 Early MCP painted pottery vessels from Tugutai.....	97
Figure 4.9 Early MCP painted pottery vessels from Linxia District	98
Figure 4.10 Early MCP painted pottery vessels from Yangshan	100
Figure 4.11 Early MCP painted pottery vessels from Liuwan.....	101
Figure 4.12 Middle MCP painted pottery vessels from Liuwan.....	103
Figure 4.13 Middle MCP painted pottery vessels from Xiahaishi.....	104
Figure 4.14 Illustration of grave goods from burial M564 at Liuwan	105
Figure 4.15 Five painted hu vases from burial M1438 at Liuwan.....	106
Figure 4.16 Late MCP painted vessels from Liuwan.....	107
Figure 4.17 MCP painted pottery vessels from Yuanyangchi.....	109
Figure 4.18 Two types of MCP vessels with different regional provenience unearthed from Liuwan.....	110
Figure 4.19 Bivariate plot of Na_2O and Al_2O_3 for 125 samples selected from Liuwan	110
Figure 4.20 Principal Component Analysis for 125 samples selected from Liuwan.....	111
Figure 4.21 Two multiple burials in timber-chambered shaft graves at Liuwan	117
Figure 4.22 Two multiple burials in horizontal chamber graves at Liuwan	117
Figure 4.23 Demographic patters of multiple burials at Tugutai, Yangshan, and Yuanyangchi	118
Figure 4.24 A double burial contains a male/female pair at Tugutai	119
Figure 4.25 A burial contains two adult males at Yangshan	120
Figure 4.26 Illustration of a horizontal chamber grave from Xiahaishi	123

Painted Pottery Production and Social Complexity in Neolithic Northwest China

Figure 4.27 Two painted vases from burial M1348 dating to the middle MCP at Liuwan..... 127

Figure 5.1 Diagrams of the suggested model of painted pottery production and distribution during the Majiayao Cultural period..... 132
