List of Figures.....	xi
List of Tables.....	xv
Abstract.....	xvii
1. Introduction.....	1
1.1. Categories of Glazed Ceramics.....	1
1.2. Current Opinion on Early Porcelain.....	2
1.3. Research Questions.....	3
1.3.1. What was the pathway of the technological transformation of glazed ceramics from a materials science perspective?	3
1.3.2. What was the social impulse driving the emergence and popularity of white porcelain?	3
1.4. Originality of the Project.....	4
2. History and Archaeology Background	5
2.1. History Background	5
2.2. Archaeology Background.....	5
2.2.1. Kiln Sites.....	8
2.2.2. Residential Sites	14
2.2.3. Burials	17
3. Materials, Samples and Methods.....	19
3.1. Material Background.....	19
3.2. Samples	20
3.2.1. Samples for Non-destructive pXRF Analysis	21
3.2.2. Samples for Destructive Analysis.....	22
3.3. Material Analysis Methods	23
3.3.1. Munsell Rock Colour Book.....	23
3.3.2. pXRF	24
3.3.3. SEM-EDS.....	24
3.3.4. XRD	25
3.3.5. Thermal Expansion.....	25
4. Typo-chronology of Glazed Ceramics in Sixth Century North China.....	27
4.1. Material Examined.....	27
4.2. Distinction between Different Categories of Glazed Ceramics	27
4.3. Chronological Sequence and Archaeological Assemblage	29
4.3.1. Stage 1: 490s–540s.....	29
4.3.2. Stage 2: 550s–570s.....	34
4.3.3. Stage 3: 580s–600s.....	37
4.4. Summary	39
5. The Transformation of Lead-glazed Ceramics	41
5.1. Introduction.....	41
5.2. Materials and Methods.....	43
5.2.1. Sites and Materials	43
5.2.2. Analysis Methods	48
5.3. Results.....	48
5.3.1. Sample Description	48
5.3.2. Body Composition.....	49
5.3.3. Glaze Composition.....	50
5.3.4. Thermal Behaviour.....	51
5.4. Discussion	57
5.4.1. Compositional Grouping	57
5.4.2. Glaze Formulation.....	60

5.4.3. Firing Condition	63
5.4.4. Coloration	66
5.5. Conclusion.....	70
6. The Introduction of Celadon into North China	75
6.1. Introduction	75
6.2. Materials and Methods	76
6.2.1. Sites Sampled for this Study	76
6.2.2. Sample Description	78
6.2.3. Analysis Methods	78
6.3. Results.....	80
6.3.1. Microstructure	80
6.3.2. Body Compositions	82
6.3.3. Glaze Compositions	82
6.4. Discussion	82
6.4.1. Regional Affiliations.....	82
6.4.2. Glaze Formulation.....	86
6.4.3. Coloration	89
6.4.4. Relative Firing Conditions	91
6.5. Conclusion.....	93
7. The Emergence of White Porcelain	97
7.1. Introduction	97
7.2. Materials and Methods	99
7.2.1. Archaeological Sites of Interest.....	99
7.2.2. Analysis Methods	100
7.3. Results.....	100
7.3.1. Microstructure	100
7.3.2. Body Composition.....	106
7.3.3. Glaze Composition.....	106
7.4. Discussion	109
7.4.1. Body Material and Alternatives.....	109
7.4.2. Glaze Formulation and Coloration.....	114
7.4.3. Firing Conditions.....	117
7.5. Conclusion.....	119
8. Discussion.....	123
8.1. Stage 1: 490s–540s: the Local Ceramic Technological Tradition and Impact of External Cultures from the West and the South	123
8.2. Stage 2: 550s–570s: the Transformation of Lead-glazed Ceramics and Introduction of Celadon Technology via the East	125
8.3. Stage 3: 580s–600s: the Spread of Celadon and Emergence of White Porcelain in the North China Plain.....	127
8.4. Summary	130
9. Conclusion	131
Index of Chinese Terminology and Place Names	133
References.....	135
