List of Figures.....	xiii
List of Tables.....	xxii
Abstract.....	xxiv
1. Introduction.....	1
1.1. Context of Study	1
1.2. Querns as Artefacts	1
1.3. Mills and Millstones.....	3
1.4. Differentiating Between Mills and Querns	4
2. From Quarry to Quern: Previous Research on	
Lava Milling Tools	5
2.1. Lava Querns: Terminology.....	5
2.1.1. Surface Dressing.....	5
2.1.2. Quern Mechanisms and Components.....	6
2.2. Lava Quern Typology.....	10
2.3. Lava Millstones: Disc Types	13
2.4. Pompeian Style Mills	16
2.5. Quarrying and Organisation of Labour.....	18
2.6. Stone extraction: Quarrying process	19
2.7. ‘Im Winkel’: A Possible Quern Finishing Location.....	22
2.8. Distribution Analysis and Mechanisms of Exchange.....	23
2.9. Transporting Goods	27
2.10. Trade Routes for Imported Goods: North Sea Trade	30
2.11. The Economy of Stone Exchange in the Roman Empire.....	31
2.12. The Lava Quern Trade in Continental Europe and Britain	34
2.13. Distribution of Provenanced Lava Milling Tools in Mainland Europe and Britain.....	34
2.14. Applying Economic Considerations: Roman Britain and the Lava Quern Trade	35
3. Volcanic Beginnings: Lava Sources.....	37
3.1. Mayen Lava as a Material	37
3.2. Geological Background.....	37
3.3. Geological Description and Properties.....	37
3.4. Petrographic and Geochemical Analysis.....	38
3.5. Future Research.....	39
4. Methodology	41
4.1. Practical Aspects of Data Collection, Recording and Analysis.....	41
4.1.1. Quantification	41
4.1.2. In-Person Quern Recording.....	42
4.1.3. Digitising the Data and Completing the Analysis	42
4.2. Object Biographies.....	42
4.3. Imported Lava Querns and Millstones: Applying an Object Biography Approach.....	43
4.3.1. Manufacture.....	44
4.3.2. Distribution.....	44
4.3.3. Primary Use.....	45
4.3.4. Re-use/Modification	46
4.3.5. Deposition/Disposal	47
5. Making Flour the German Way: Analysis of Lava Quern and Millstone Use Across the Province	49
5.1. The Dataset.....	49
5.2. Manufacture	51
5.2.1. Diameter of Stone.....	51
5.2.2. Width of Kerb	52
5.2.3. Handle Fittings	53

5.2.4. Rynd Chase Types	55
5.3. Distribution	55
5.3.1. Overall Spatial Distribution.....	55
5.3.2. Distribution by Site Type.....	57
5.3.3. Chronological Change in Distribution	57
5.4. Primary Use.....	60
5.4.1. Stone Thickness for the Whole Dataset.....	60
5.4.2. Stone Thickness by Region	61
5.4.3. Stone Thickness by Site Type.....	62
5.5. Reuse	65
5.6. Deposition	66
5.7. Conclusion.....	70
6. Foreign Stone in the Hands of Farmers: Lava Querns and Millstones in Rural Roman Britain	73
6.1. Introduction	73
6.2. The Dataset.....	73
6.2.1. Millstones vs Quern stones	74
6.2.2. Rural Quern Stone Thickness.....	76
6.3. Distribution Analysis.....	78
6.3.1. General Distribution: Examining Presence/Absence of Lava Milling Tools	79
6.3.2. Close-up Analysis of Distributions in East Anglia and the South-East.....	83
6.3.3. Distribution by Site Type.....	85
6.3.4. Chronological Distribution.....	89
6.4. Conclusion.....	91
7. Day to Day Grind of Urban Life: Lava Quern and Millstone Use in Romano-British Towns	93
7.1. Verulamium: Introduction and Background.....	93
7.2. Verulamium: The Dataset.....	95
7.3. Verulamium: Manufacture	95
7.3.1. The Millstones	96
7.3.2. The Miniature Milling Tool.....	98
7.3.3. The Querns	100
7.4. Verulamium: Distribution.....	101
7.5. Verulamium: Primary Use.....	109
7.6. Verulamium: Reuse/Modification	110
7.7. Verulamium: Deposition	113
7.8. Verulamium: Conclusions	114
7.9. Silchester: Introduction and Background.....	114
7.10. Silchester: The Dataset.....	116
7.11. Silchester: Manufacture.....	116
7.11.1. Millstones vs Querns	116
7.11.2. The ‘Pompeian’ Style Millstones	118
7.11.3. Identifiable Typological Features	119
7.12. Silchester: Distribution.....	120
7.12.1. Distribution by Stone Type.....	120
7.12.2. Chronological Distribution- Lava Volume and Comparison with Other Stone Types	121
7.13. Silchester: Primary Use.....	124
7.13.1. Stone Thickness.....	124
7.13.2. Dressing Style	124
7.14. Silchester: Reuse/Modification	125
7.15. Silchester: Deposition	126
7.16. Silchester: Conclusions	128
7.17. Urban Sites: Conclusions	129
8. Milling at the Edge of an Empire: Lava Quern and Millstone Use at Northern Military Sites	133
8.1. Corbridge: Introduction and Background	133
8.2. Corbridge: The Dataset	135
8.3. Corbridge: Manufacture	135
8.3.1. Stone Diameter	135

8.3.2. Kerbs	136
8.3.3. Handle Fittings	136
8.3.4. Rynd Fittings	137
8.3.5. Surface Dressing.....	137
8.4. Corbridge: Distribution	137
8.5. Corbridge: Primary Use	139
8.5.1. Upper Quern Stone Thickness.....	139
8.5.2. Lower Quern Stone Thickness	140
8.6. Corbridge: Reuse/Modification.....	140
8.7. Corbridge: Deposition.....	142
8.8. Chesters: Introduction and Background.....	142
8.9. Chesters: The Dataset.....	143
8.10. Chesters: Manufacture	144
8.10.1. Lower Stones.....	144
8.10.2. Upper Stones	145
8.10.3. Unidentified Stone.....	145
8.10.4. Stone Diameters	145
8.11. Chesters: Primary Use.....	146
8.12. Chesters: Reuse/Modification	146
8.13. Housesteads: Introduction and Background.....	146
8.14. Housesteads: The Dataset	148
8.15. Housesteads: Manufacture	149
8.15.1. Diameter of Stone.....	149
8.15.2. Kerbs and Handle Fittings.....	150
8.15.3. Dressing.....	151
8.16. Housesteads: Distribution	151
8.17. Housesteads: Primary Use.....	154
8.17.1. Upper Stone Thickness.....	154
8.17.2. Lower Stone Thickness	154
8.18. Housesteads: Reuse/Modification	154
8.19. Housesteads: Deposition	157
8.20. Vindolanda: Introduction and Background	157
8.21. Vindolanda: The Dataset	158
8.22. Vindolanda: Manufacture.....	160
8.22.1. Kerbs	160
8.22.2. Diameter of Stone: Quern vs Millstone.....	160
8.22.3. Quern Diameter	161
8.22.4. Rynd	162
8.22.5. Handle Fittings	162
8.23. Vindolanda: Distribution.....	163
8.23.1. Spatial Distribution	163
8.23.2. Chronological Distribution.....	164
8.24. Vindolanda: Primary use	165
8.24.1. Wear Traces	165
8.24.2. Quern Thickness: Upper Stones	166
8.24.3. Quern Thickness: Lower Stones.....	167
8.24.4. Inscriptions	168
8.25. Vindolanda: Re-use/Modification	169
8.26. Vindolanda: Deposition.....	172
8.27. Vindolanda: Conclusion	173
9. Conclusion	177
10. Bibliography	179
